"Research and Education at KTH, the Royal Institute of Technology in Stockholm, Sweden and the land-use evolution and impact assessment model (LEAM) for the Stockholm region."

Presented by
Jan Haas

Wednesday, September 7th 2011
225 Temple Buell Hall
12:00 pm

About the presentation:

As a PhD student and guest researcher from KTH, the Royal Institute of Technology in Stockholm, Sweden, School of Architecture and the Built Environment, Geoinformatics Division, Jan Haas will inform about his school and introduce some projects he is participating in. The talk will cover the following three main topics:

-Introduction to research and education at KTH
-Satellite Monitoring of Urbanization in China for Sustainable Development
-Land-use evolution and impact assessment model (LEAM) for the Stockholm region

The talk will be followed by question-answer session. For more information on Jan’s work, please contact him directly (jhaas@kth.se) or have a look at their homepages (http://www.infra.kth.se/GIS/ and http://www.kth.se/?l=en_UK).
